ELSEVIER

SUBJECT INDEX FOR VOLUME 8

A

A kinase anchoring proteins (AKAP), cAMP-dependent protein kinase anchoring, 89
β-Adrenergic receptor internalization, G protein-coupled receptors, 234
Allotransplantation, quality of life, 319
Alzheimer's disease, apolipoprotein E, 250
Anesthetic/antiarrhythmic agents, voltage-gated sodium channels interaction, 83
Angiogenesis
  CXC chemokine role in regulation, 51
  vascular endothelial growth factor role, 241
Antiarrhythmic agents, voltage-gated sodium channels interaction, 83
Anticoagulant thrombins, function/regulation, 340
Apolipoprotein B biogenesis, hepatic, 8
Apolipoprotein E, structural plasticity in nervous system, 250
Arterial tone regulation, nitric oxide and cGMP, 14
Asymmetry, gene action, 215
Atherosclerosis
  chemokines role, 169
  endothelial cell apoptosis, 19
  hepatic apolipoprotein B biogenesis, 8
  infectious agents role, 191
  macrophage proliferation, 119
  reactive oxygen species as mediators of signal transduction, 49
  tumor necrosis factor-α receptors, 131

B

Biomineralization, vascular tissue calcification, 199

C

C-terminal domain, skeletal muscle Ca^{2+} release channel, 312
Ca^{2+}-ATPase
  sarco(endo)plasmic reticulum, isoform diversity and expression/modulation, 75
  sarcoplasmic reticulum mutagenesis, 41
  phospholamban regulation, 330
cAMP-dependent protein kinase, functional anchoring, 89
Cancer, lung, CXC chemokine role in regulation of angiogenesis, 51
Capillary malformations, molecular basis, 281
Cardiac cell junction formation, molecular analysis, 97
Cardiac development, regulation by tyrosine kinases, 34
Cardiac failure, xenotransplantation, 319
Cardiac K^+ channel, I_{Ks} and long QT diseases, 207
Cardiac myosin-binding protein C, hypertrophic cardiomyopathy, 151
Cardiogenic development, embryonic stem cells, 64
Cardiomyocyte gap junctions, growth-promoting signaling, 180
Cardiomyocyte proliferation/differentiation embryonic stem cell-derived, 64
  opioid peptide gene expression, 102
  regulation by tyrosine kinases, 34
Cardiomyopathy, hypertrophic, cardiac myosin-binding protein C, 151
Cardiovascular disease, signal transduction mediators, 49
γ-Catenin, role in heart tissue architecture and stabilization, 97
Cell adhesion regulation, Rho GTPase, 162
Cell behavior, regulation by fibronectin-fibrin cross-linking, 357
Central nervous system, apolipoprotein E, 250
cGMP, arterial tone regulation, 14
Chemokines, role in cardiovascular disease, 169
Chlamydia pneumoniae, atherosclerosis, 191
Coagulation factor VIIa, cofactor-dependent coagulation serine protease, allosteric regulation, 350
Coagulation serine protease, cofactor-dependent, allosteric regulation, 350
Cobra cardiotoxin, glycosaminoglycan-binding studies, 270
Cofactor-dependent coagulation serine protease, allosteric regulation, 350
Congenital heart malformations, connexin 43 gap junctions, 264
Connexin 43 gap junctions, role in cardiac development, 264
Connexin phosphorylation, cardiomyocyte gap junctions, 180
CXC chemokines, angiogenesis and lung cancer, 51
Cytomegalovirus, atherosclerosis, 191
Cytoplasmic domains, skeletal muscle Ca^{2+} release channel, 312
Cytoskeleton regulation, Rho GTPase, 162

D

Desmosomal proteins, plakoglobin, 97
Development
  cardiac
    connexin 43 gap junctions, 264
    regulation by tyrosine kinases, 34
  cardiogenic, embryonic stem cells, 64
  embryonic, gene action controlling heart asymmetry and torsion, 215
  neural crest, regulation by tyrosine kinases, 34
Dihydropyridine receptor, role in skeletal muscle excitation-contraction coupling, 312

E

Embryonic development, gene action controlling heart asymmetry and torsion, 215
Embryonic stem cells, cardiac differentiation, 64
Endocytosed lysophosphatidylcholine, role in macrophage proliferation, 119
Endothelial cell death, tumor necrosis factor, 19
Endothelial cells
  lymphatic and blood vascular, growth factors, 292
  NF-κB transcription factors, 138
Endothelin receptor type B, posttranslational modifications, 327
ET receptor subtypes, endothelin receptor type B, posttranslational modifications, 327

Extracellular matrix, injury-associated, cell growth and gene expression alterations, 357

F

Factor VIIa, cofactor-dependent coagulation serine protease, allosteric regulation, 350
Fibrin, role in cell behavior regulation, 357
Fibrinolysis, plasminogen activator inhibitor-1 and vibronectin role, 175
Fibronectin-fibrin cross-linking, role in cell behavior regulation, 357

G

G protein-coupled receptors, β-adrenergic receptor internalization, 234
G protein-receptor kinases, role of alterations, 297
G_{11} protein signaling, specificity in vascular myocytes, 157
Gap junctions
  cardiomyocyte, growth-promoting signaling, 180
  connexin 43, role in cardiac development, 264
Gene action, heart asymmetry and torsion control, 215
Gene expression, opioid peptide, myocardial cell, 102
Gene targeting, hypertension, 256
Glycosaminoglycan-binding studies, cobra cardiotoxin and phospholipase A_2, 270
G_q protein signaling, specificity in vascular myocytes, 157
Growth regulation, cardiomyocyte gap junctions, 180

H

Haber, Edgar, in memoriam, 6
Heart asymmetry, gene action, 215
Hemangiomas, molecular basis, 281
Heparin
  affinity for multimetric vibronectin, 124
  vibronectin binding sites, 124
Hepatic apolipoprotein B biogenesis, 8
Herpes simplex virus, atherosclerosis, 191
Hypertension
  impaired vasodilator function, 297
  reactive oxygen species as mediators of signal transduction, 49
  transgenesis, 256
Hypertrophic cardiomyopathy, cardiac myosin-binding protein C, 151
Hypoxia
  regulation of vascular endothelial growth factor mRNA, 246
  vascular effects, 24

I

I_{Ks}, long QT diseases, 207
Imperatoxin A, ryanodine receptor structure/function studies, 111
Infectious agents, atherosclerosis, 191
Ischemic reperfusion injury, chemokines role, 169
Isoform diversity, sarco(endo)plasmic reticulum Ca^{2+}-ATPase, 75

K

Kvβ subunits, Shaker-type potassium channels, 229
KvLQT1, effects on I_{Ks} current, 207

L

Local anesthetic/antiarrhythmic agents, voltage-gated sodium channels interaction, 83
Long QT diseases, I_{Ks}, 207
Low density lipoprotein receptor-related protein, soluble forms, 363
Lung cancer, CXC chemokine role in regulation of angiogenesis, 51
Lymphatic cells, growth factors, 292
Lymphatic malformations, molecular basis, 281

M

Macrophage proliferation, oxidized low-density lipoprotein-induced, 119
Mineralization, bio-, vascular tissue calcification, 199
p38 Mitogen-activated protein kinase, pathway and biological function, 221
Molecular cardiovascular medicine, hypoxia effects, 24
Monocytes, NF-κB transcription factors, 138
Mutational analysis, sarcoplasmic reticulum Ca^{2+}-ATPase, 41
Myocardial cell, opioid peptide gene expression, 102
Myosin-binding protein C, cardiac, hypertrophic cardiomyopathy, 151

N

Neural crest development
  connexin 43 gap junctions, 264
  regulation by tyrosine kinases, 34
NF-κB transactivation proteins, hypoxia effects, 24
NF-κB transcription factors, endothelial and monocytic cells, 138
Nitric oxide, arterial tone regulation, 14

O

Opioid peptide gene expression, myocardial cell, 102

P

p38 Mitogen-activated protein kinase, pathway and biological function, 221
Palmitoylation, endothelin receptor type B, 327
Peptide gene expression, opioid, myocardial cell, 102
Peptide toxins, ryanodine receptor structure/function studies, 111
Phospholamban function/expression, molecular regulation, 330
Phospholipase, role in prostaglandin synthesis, 145
Phospholipase A_2, glycosaminoglycan-binding studies, 270
Phosphorylation, endothelin receptor type B, 327
Plakoglobin, role in heart tissue architecture and stabilization, 97
Plakoglobin knock-out mouse, 97
Plasminogen activator inhibitor-1, role in vascular wound healing, 175
Potassium channels, Shaker-type, auxiliary subunits, 229
Prostaglandin synthase, effects, 145
Prostaglandin synthesis, prostaglandin synthase effects, 145
Prostheses, quality of life, 319
Protein kinases
  cAMP-dependent, functional anchoring, 89
  tyrosine, cardiac development regulation, 34

Q

Quality of life, cardiac prostheses vs. allotransplantation, 319

R

Reactive oxygen species, signal transduction mediators, 49
Receptor-G protein coupling, role of alterations, 297
Retinoic acid, ventricular cardiomyocyte differentiation, 64
Rho GTPase, cytoskeleton and cell adhesion regulation, 162
RNA-binding proteins, hypoxic regulation of vascular endothelial growth factor mRNA, 246
Ryanodine receptors, peptide toxins in structure/function studies, 111

S

Sarco(endo)plasmic reticulum Ca^{2+}-ATPase, isoform diversity and expression/modulation, 75

Sarcoplasmic reticulum Ca^{2+}-ATPase
mutagenesis, 41
phospholamban regulation, 330
Scorpian venom, ryanodine receptor structure/function studies, 111
Secretory pathway, tissue plasminogen activator targeting, 306
Shaker-type potassium channels, Kvβ subunits, 229
Signal transduction, reactive oxygen species as mediators, 49
Skeletal muscle Ca^{2+} release channel, functional interactions of cytoplasmic domains, 312
Sodium channels, voltage-gated, interaction with local anesthetic/antiarrhythmic agents, 83

T

Thrombins, anticoagulant, function/regulation, 340
Tissue plasminogen activator, targeting to regulated pathway of secretion, 306
Torsion, gene action, 215
Transgenesis, hypertension, 256
Tumor necrosis factor
endothelial cell death, 19
role in atherosclerosis, 131
Tyrosine kinases, cardiac development regulation, 34

V

Vascular anomalies, molecular basis, 281
Vascular endothelial cell
growth factors, 292
hypoxia effects, 24
Vascular endothelial growth factor, functions in vasculature, 241
Vascular endothelial growth factor-C, structure/regulation, 292
Vascular endothelial growth factor mRNA, hypoxic regulation, 246
Vascular myocytes, G_q and $_{11}$ protein signaling, 157
Vascular remodeling, reactive oxygen species as mediators of signal transduction, 49
Vascular smooth cells, hypoxia effects, 24
Vascular tissue calcification, biomineralization, 199
Vascular tumors, molecular basis, 281
Vascular wound healing, plasminogen activator inhibitor-1 and vibronectin role, 175
Vasculogenesis, vascular endothelial growth factor role, 241
Vasodilator function, impaired, hypertension, 297
Ventricular cardiomyocyte differentiation, retinoic acid effects, 64
Vibronectin
binding sites, 124
role in vascular wound healing, 175
Vitamin K-dependent clotting enzymes, function/regulation, 340
Voltage-gated sodium channels, interaction with local anesthetic/antiarrhythmic agents, 83

W

Wound healing, vascular, plasminogen activator inhibitor-1 and vibronectin role, 175

X

Xenotransplantation, cardiac failure, 319
